

Year 7 - Geography - 2022

TERM 1

Topic 1: Landscapes and Landforms

Through a variety of resources students investigate different landscapes and the geomorphic processes that create distinctive landforms.

UNIT OVERVIEW

- Geomorphic processes that create landforms
- Types of landscapes and landforms
- Value of landscapes and landforms
- Changing landscapes
- Landscape management and protection
- Geomorphic hazard

ASSESSMENT

Task Number: 1

Nature of Task:
Examination (MCQ,
mapping skills and
short answer
questions)

Percentage: 50%

Week: 10

Reported: Semester 1

TIMING
Weeks:10

TERM 2**Topic 2: Place and Liveability**

Students discuss factors that influence people's perceptions of the liveability of places. They investigate features and characteristics of places across a range of scales that support and enhance people's wellbeing such as community identity, environmental quality and access to services and facilities. Students assess the liveability of places and propose strategies to enhance the liveability of a place in Australia.

UNIT OVERVIEW

- Why do people's perceptions of the liveability of places vary?
- What effect does environmental quality and access to services have on people's wellbeing?
- How can strong community identity and social connectedness enhance the liveability of places?
- What approaches can be used to improve the liveability of places?
